## Bondmaster A2

The Bondmaster A2 is a manually fed laminating machine normally used for short to medium run work, however as it is modular in nature automatic feeders and sheeters may be added, making the system even more productive. The machine has been ergonomically designed for ease of operation making it simple and logical to use, eliminating the need for technical staff to operate the machine.

The Bondmaster A2 is a flexible machine allowing the use of a wide variety of laminating films, fulfilling both one and two sided requirements. The machine is fitted with a manual feed table comprising of segmented green belts. These belts drive the printed sheets into the nip rollers where they meet the coated film. Lamination takes place where air is expelled between the nip rollers and the coated film meters the printed sheets. These sheets in effect become a web joined together by the film

### SPECIFICATIONS:

Motor	: 1/17hp
Power Requirement	: 220v 240v 50-60 Hz single phase
Max. Power Consumption	: 5000 watts
Max. Laminating Width	: 510mm
Machine Dimensions	: 800mm wide x 1500mm x 1600mm high, 1250 without film and perf uprights
Machine Weight	: 230kg
Packed Weight	: 310kg (3.96m <sup>3</sup> ) 1 x 2.14 x 1.84 high
Speed	: 10 metres/minute (manual)

### Inline Sheeter:

The web is sheeted in line by rollers operating at faster speeds and delivering the laminated sheet into the catcher unit.

**Features:** Heavy duty motor, variable speed control, emergency stop button, adjustable catcher, easy positioning.

<b>Specifications:</b>	Power Supply	: 220/240vac
	Net Weight	: 100kg
	Machine Dimensions	: 1080mm x 810mm x 970mm
	Power Consumption	: 500W (.5kw)
