

The goal for the bookbindery is to set up reliable on-line production with reduced manual labor even behind slower machines. The new RS 11 is the best solution for automatic stacking behind saddle stitchers, perfect binders and inserters. The solid and simple design makes the RS 11 a real alternative for all bookbinderies with limited budgets. The RS 11 integrates counting, jogging and compensated stacking. The quick non-tool setup, variable delivery and minimum space requirements allow effective application in various configurations.
